WORLD BLOCKCHAIN STO SUMMIT SINGAPORE

26-27 FEB 2020

<https://sg.worldblockchainstosummit.com>

EVENT OVERVIEW

3rd Edition World Blockchain STO Summit will be one of the most important summits in Asia, dedicated to innovative technologies, bringing together the biggest names, and the brightest minds who are actively shaping the industry. World Blockchain STO Summit's special focus will be given to understanding what "STOs" (securitized token offerings) are involved. Additionally, there will be coverage over other classes of emerging technology and alternative investment instruments, and how they can be leveraged to generate value and profit. In this summit, we will explore how STO's are a better choice for businesses looking to raise capital because they offer unique advantages such as low barrier of entry, fractional ownership and access to global investors. The Summit leverages the experience gained through the last 2 editions of the event to ensure maximum return on investment for all our sponsors, partners & attendees. Known popularly as the blockchain and crypto hub of Southeast Asia, Singapore, with its free market economy, stable socio-political environment, attractive tax framework, is consistently ranked as the world's best place to do businesses using Blockchain technology and cryptocurrencies. Last year, Singapore was the second most popular location for initial coin offerings (ICOs), behind the United States. Recently, the Money Authority of Singapore (MAS) has announced it was working on a new bill to regulate crypto exchanges, and since prospective blockchain or crypto business owners can set up a startup in the country either as a resident or foreigner. All these favourable factors have encouraged many foreign and resident investors and entrepreneurs to choose Singapore as a place to launch their ICOs, STOs, and crypto exchanges.
